Lumen Devices – Environmental Report 2025

FICTIONAL DEMO REPORT – company and all figures are invented for testing.

Overview

Lumen Devices designs smartphones and wearables for customers in 40 countries. We reduced our total Scope 1 and 2 emissions by 31% compared with 2019. Our smartwatch is carbon neutral. We will cut Scope 3 emissions by 40% by 2030 versus 2019, a target validated by the SBTi. We aim to use 100% renewable electricity across our supply chain by 2030.

Indicator	2024	2025
Employees	12,400	12,950
Revenue (EUR m)	3,210	3,480

Products

Our new phone uses 25% recycled aluminium in the enclosure. We offset remaining emissions from business travel, making our corporate travel climate neutral. Our devices are designed to be environmentally friendly. We recovered 4,800 tonnes of electronic waste through our take-back programme in 2025. We are dedicated to building a circular economy.

Supply chain

Our suppliers consumed 1.9 million MWh of renewable electricity for Lumen production in 2025. We will publish a transition plan with interim milestones for 2027 and 2030. Regulation on electronic waste is expected to tighten in the European Union.

Reporting

Our Scope 1 and 2 emissions amounted to 182,000 tCO2e in 2025. This report references the GRI Standards, including GRI 305-1 and 305-2.
